They have capability and expertise to develop and deliver customized training programs as per the needs specified by SME and MNC”.**

**GANESH LAD**

**Founder, RAHITECH**

# Why Data Analytics?

Data analytics is a discipline focused on extracting insights from data. Data analytics is the process of exploring and analysing large datasets and its chief aim to find hidden patterns, and unseen trends, discover correlations, and derive valuable insights to make business predictions. Data analytics has become increasingly important in the enterprise as a means for analyzing and shaping business processes and improving the decision-making, speed, and efficiency of your business.

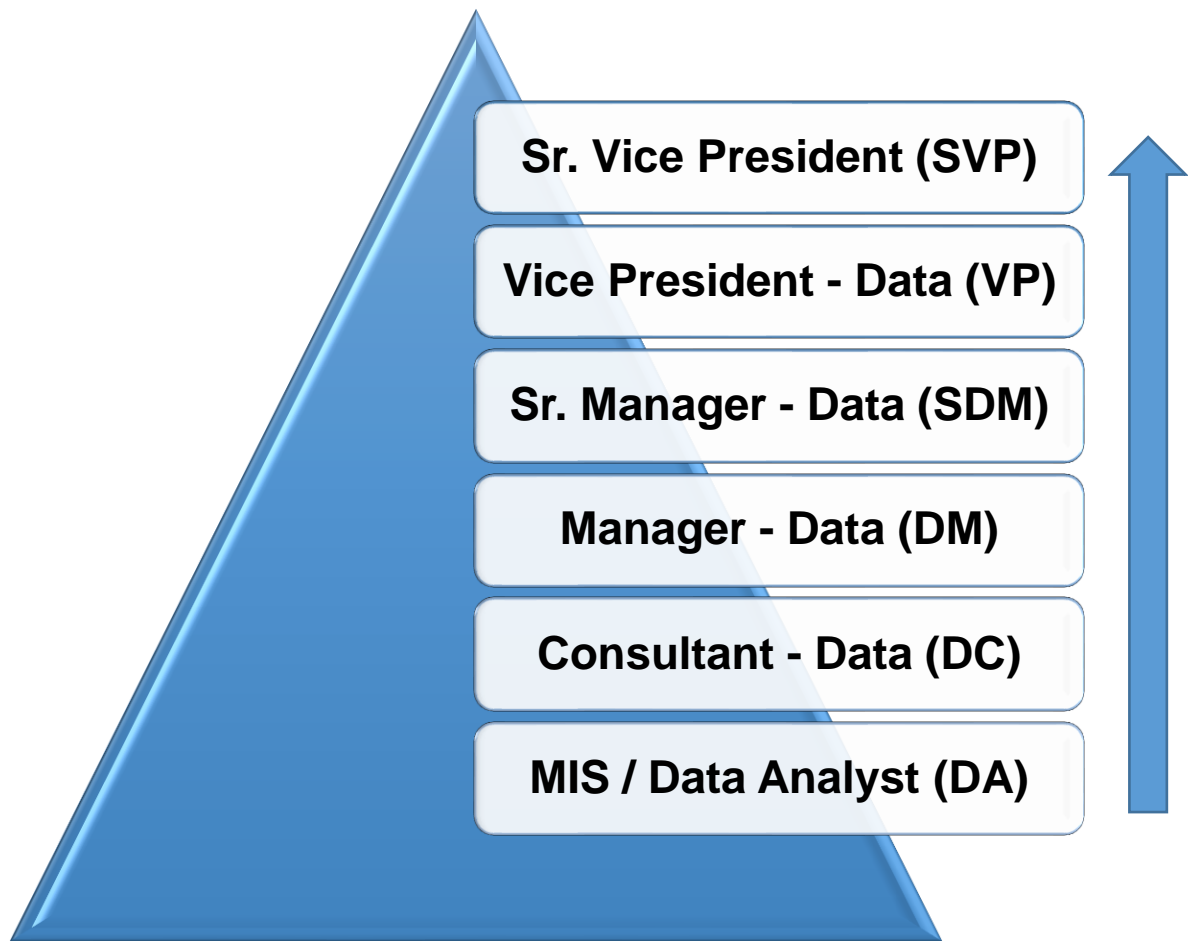

We can use data analytics for Improved Decision Making, Better Customer Service, Efficient Operations, Effective Marketing, etc. The process involved in data analysis involves several different steps as Understanding the problem, Data Collection, Data Cleaning, Data Exploration and Analysis, Visualize and sharing your results.

Data analytics has been adopted by several sectors, such as the Sales, Finance, travel and hospitality industry, where turnarounds can be quick. This industry can collect customer data and figure out where the problems, if any, lie and how to fix them. Healthcare is another sector that combines the use of high volumes of structured and unstructured data and data analytics can help in making quick decisions. Similarly, the retail industry uses copious amounts of data to meet the ever-changing demands of shoppers.

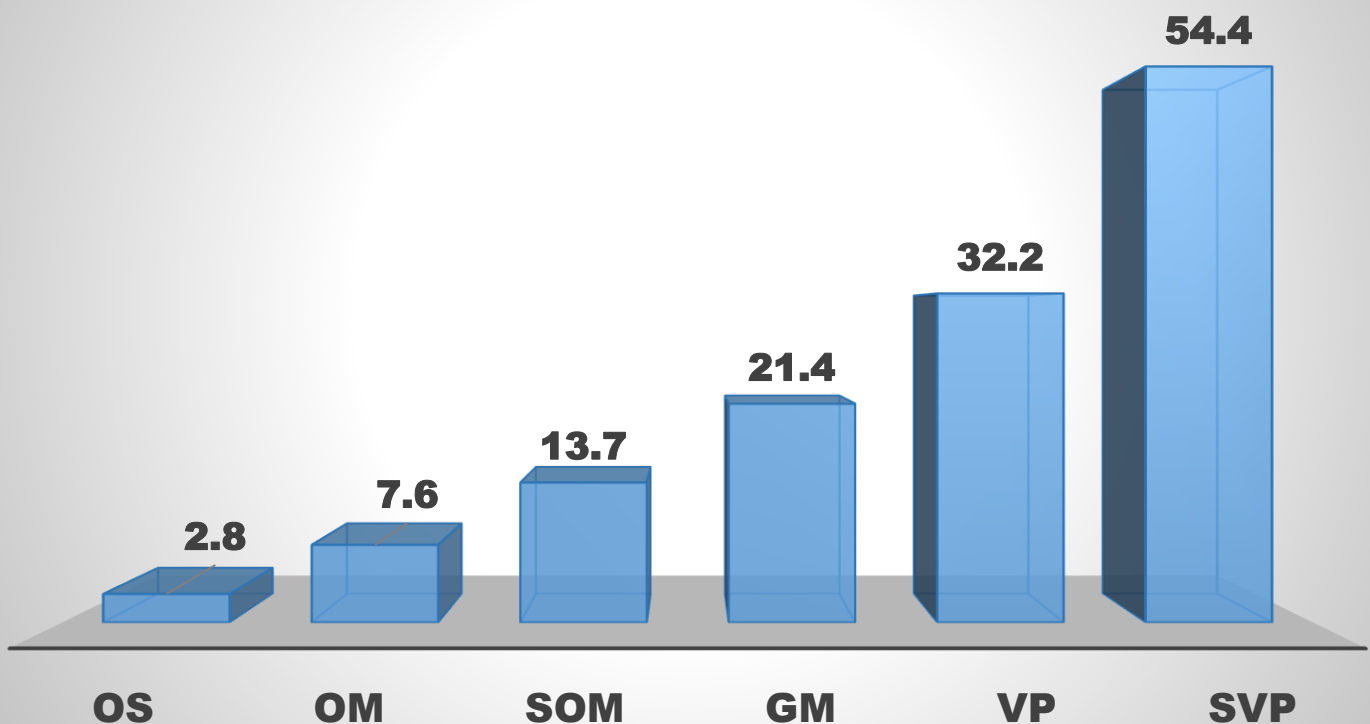

In a world increasingly becoming reliant on information and gathering statistics, data analytics helps individuals and organizations make sure of their data. Using a variety of tools and techniques, a set of raw numbers can be transformed into informative, educational insights that drive decision-making and thoughtful management.

Average Salary (INR LPA)

# About **JOB LINKED INTEGRATED PROGRAM**

Job Linked Integrated Program – Data Analytics is a joint offering from RAHITECH and Aaditya Foundation to freshers, unemployed graduates and working professionals to help them build Operations Management skillsets and be part of one of the most important departments in any organization.

This program has been thoughtfully designed to build your Personal Skills, train you on Data Engineering, Data Visualization, Data Analytic and Data Science Skills. This program will train you on Communication Skills, Organization Skills and most of the important aspects of Data Science.

While the Concepts are important to learn, it is equally important to experiment the learning in Live scenarios. We make this possible by making you work in Real Life Scenarios giving you the required experience.

Data Science Concepts will be taught to you by Industry Experts through the Classroom and Online Sessions. Case Studies and Assignment are part of course curriculum to make you a Thinking Manager.

Preparing you for Interviews through mock interviews, group discussions is integrated into the program to ensure you succeed in interviews.

On successful completion of the 6 months of course you will be provided relevant job opportunities in some of top organizations.

**Our Job Linked Integrated Programs will give a head start over all the candidates looking to start a promising career and grow to Management Levels. It will also help professionals in lower Management Roles looking for a career growth.**

**The Programs have been designed to give you an experiential learning by working in live scenarios and also help you learn the Concepts of Management”.**

## Candidate Speaks

RahiTech helped me identify the multidimensional view needed to think about Management & personal Skills. The course content is well defined for learning various methodologies. On top of that, the views depicted by some of the industry experts and mentors helped me understand more about the organizational skill in Infosys Ltd – **Rohan Rajput**

“The course structure was well organized with in-depth content. The mentors were very knowledgeable with hands-on experience on the topics. I believe the knowledge I gained through this program will help me enter into a fabulous working environment at Accenture”. **Dhanshree Dhebe**

We have trained 1000+ developers working at below companies:
